Index to Volume XXIX, September 1999 to May 2000

Author Index

Beichner, Robert J., and David S. Abbott. Video-based labs for introductory physics courses. N 101

Berger, Daniel J. Constructivism—Lacking a theoretical framework for learning. Letters. N 76

Bieron, Joseph F., and Frank J. Dinan. Avogadro goes to court. The Case Study. N 81

Blakely, Alan. Designing and implementing a constructivist chemistry laboratory program. M/A 325

Borsari, Bruno, and Malcolm F. Vidrine. An evaluation tool for improving undergraduate curricula in agriculture. The Two-Year College. F 235

Breyer, John. To reweave a rainbow. Guest Editorial. D/J 148

Brown, Kenneth H. Profiles. F 219

Brunner, Regina Baron. Reviewing *Patterns in the Sand* by Terry Bossomaier and David Green. Book Reviews. M/A 368

Buxeda, Rosa J., and Deborah A. Moore. Using learning-styles data to design a microbiology course. Research and Teaching. D/J 159

Caprio, M.W. Designing nonmajors' science courses—Is there a better way? The Two-Year College. N 134

Caprio, M.W. Navigating the standards. The Two-Year College. D/J 165

Cherif, Abour, and Stefanos Gialamas. "Creative final projects" in mathematics and science. F 272

Cohen, Paul and Brenda. Yellowstone national park. Finding Science Past and Present. S/O 68

Cohen, Paul and Brenda. Gladstone, the working museum of the potteries, in Longton, England. Finding Science Past and Present. N 141

Cohen, Paul and Brenda. Amgueddfa Genelaethol Cymru, the National Museum of Wales in Cardiff. Finding Science Past and Present. D/J 214

Cohen, Paul and Brenda. The Roman Baths Museum in Bath, England. Finding Science Past and Present. F 285

Cohen, Paul and Brenda. The Edinburgh Zoo in Scotland. Finding Science Past and Present. M/A 362

Cohen, Paul and Brenda. Indiana Medical History Museum in Indianapolis. Finding Science Past and Present. May 442

Colyer, Christa. Death in a Viennese maternity ward. The Case Study. M/A 299

Cornely, Kathleen. Journal articles as case studies. N 114

Crittell, Charles M., Daniel M. McInness, Doug W. Weirick, and Daniel Block. Sharing the rewards of teaching with high school students. Letters. May 377

Crowther, David T. Cooperating with constructivism. Research and Teaching. S/O 17

D'Avanzo, Charlene. What college science faculty can learn about change. N 126

Deeds, Donald G., Mark D. Wood, Bruce W. Callen, and Charles S. Allen. Contemporary student attitudes about mathematics, science, and technology. Research and Teaching. N 86

Dewey, Kenneth F., and Steven J. Meyer. Active learning in introductory climatology. F 265

Didion, Catherine J. Science for the twenty-first century: A new commitment? Women in Science. S/O 63

Dimaculangan, Dwight D. et al. A multidimensional approach to teaching biology. M/A 330

Dooley, Dian A. Accepting faculty responsibility for teaching undergraduates about the research process. Letters. N 76

Dooley, Dian A. In search of information on science curricula for elementary education majors. Letters. F 223

Dooley, Dian A. The study of ethics in the applied science curriculum. M/A 341

Druger, Marvin. National standards for introductory college science courses? SCST. D/J 154

Dubowsky, Nathan, Elliott Hartman, Leonard Simons, and Jerry Przybylski. The graying of science faculty in U.S. colleges and universities. The Two-Year College. May 390

Dujari, Anuradha. Reviewing *Common Science? Women, Science, and Knowledge* by Jean Barr and Lynda Birke. Book Reviews. D/J 210

Dujari, Anuradha. Changes in science education—Are we getting ready? SCST. F 283

Dujari, Anuradha. Recognizing the achievements of women in science. May 428

Dukelow, W. Richard. A shared biology teaching experience among undergraduate colleges. S/O 50

Ferguson, Charles A. Profiles. May 371

Francek, Mark. Multimedia term papers in introductory earth science classes. D/J 199

French, Donald. Profiles. M/A 291

Galupo, M. Paz, and Gail E. Gasparich. Women *and* science. Women in Science. F 279

Gill, Richard A., and Ingrid C. Burke. Using an environmental science course to promote scientific literacy. N 105

Glazer, Francine S. Journal clubs—A successful vehicle to science literacy. M/A 320

Godrick, Elizabeth, and Standish Hartman. Integrating introductory biology and general chemistry laboratories. D/J 184

Gutierrez, Carlos G. Science in the twenty-first century must include all of us. Point of View. May 394

Hageseth, Gaylord T. Power demand for walking on the treadmill. F 261

Hajek, Kathryn L. An interactive, fiery model of genetic complementation. Favorite Demonstration. S/O 65

Halyard, Rebecca A., and Brooke M. Pridmore. Changes in teaching and learning—The role of new technology. SCST. May 440

Harker, Alan. Full application of the scientific method in an undergraduate teaching laboratory. N 97

Harrill, Robert W. Evolving curricula in the new century. May 401

Hays, Elizabeth T. Reviewing *Methods of Effective Teaching and Course Management for University and College Science Teachers,* edited by E.D. Siebert, M.W. Caprio, and C.M. Lyda. Book Reviews. S/O 16

Heady, Judith E. Assessment—A way of thinking about learning—now and in the future. May 415

Herreid, Clyde Freeman. Saint Anthony and the chicken poop. The Case Study. S/O 13

Herreid, Clyde Freeman. Cooking with Betty Crocker. The Case Study. D/J 156

Herreid, Clyde Freeman. And all that jazz. The Case Study. F 225

Herreid, Clyde Freeman. Lallapalooza. Guest Editorial. M/A 294

Herreid, Clyde Freeman. The last teacher. May 423

Hershey, David. Cheaper equipment for the floating leaf disk experiment. Letters. S/O 11

Hickam, Homer, Jr. A reflection on *Rocket Boys/October Sky* in the science classroom. May 399

Holmes, Sandra A. Profiles. D/J 147

Hoots, Rita. Research vs. teaching—Can the roles be combined? S/O 30

Hoots, Rita. Reviewing *Advice for a Young Investigator* by Santiago Ramon y Cajal. Book Reviews. N 144

Hoots, Rita. Reviewing *Interactive Biology Multimedia Courseware.* Instructional Media. F 287

Jaffe, Dan, and Laurie Chavasse. Comparing the CO content of cigarette smoke and auto exhaust. D/J 172

Johnson, Margaret. Profiles. M/A 291

Kauffman, George B. Reviewing *Chemical Achievers: The Human Face of the Chemical Sciences.* Instructional Media. S/O 71

Kauffman, George B. Reviewing *Guide of European Museums with Collections on History of Chemistry.* Instructional Media. N 143

Kauffman, George B. Reviewing *Calendar 2000: The History of Xenobiotic Metabolism.* Instructional Media. D/J 216

Kauffman, George B., and Hiram William Blanken. Reviewing *CHEMiCALC Database and Calculation Software Tool.* Instructional Media. M/A 366

Kauffman, George B., and David L. Zellmer. Reviewing *Powers of Ten Interactive.* Instructional Media. May 445

Kermis, William J. Profiles. May 371

Kronberg, Joyce R., and Marshall S. Griffin. Analysis problems—A means to developing students' critical-thinking skills. M/A 348

Lawson, Anton, Cecil M. Lewis Jr., and James P. Birk. Why do students "cook" data? D/J 191

Lee, Nancy E. A mentoring program with hands-on laboratory experiments. S/O 47

Leonard, William H. How do college students best learn science? Research and Teaching. May 385

Lopushinsky, Ted. Scientific "truth"—A barrier to understanding? Point of View. N 93

Lord, Thomas R. Are we cultivating 'couch potatoes' in our college science lectures? The Two-Year College. S/O 59

MacGowan, Catherine. Profiles. S/O 3

Mantei, Erwin J. Using internet class notes and powerpoint in the physical geology lecture. Research and Teaching. M/A 303

Matern, Scott A., and Joaquin B. Feliciano. Drawing to learn morphology in a fish taxonomy laboratory. M/A 289

McComas, William F., and Anne Marshall Cox-Petersen. Enhancing undergraduate science instruction—The G-step approach. N 120

McIntosh, William J. Beyond 2000—The changing face of undergraduate science education. May 379

McLean, Robert J.C. Original research projects—A major component of an undergraduate microbiology course. S/O 38

Moss, Robert. The molecular evidence for evolution. N 111

Morse, Joseph G. An integrative science capstone course. S/O 53

Muench, Susan Bandoni. Choosing primary literature in biology to achieve specific educational goals. F 255

O'Brien, Julie J., and James F. O'Brien. The laporte selection rule in electronic absorption spectroscopy. Favorite Demonstration. N 138

Paldy, Lester G. Thoughts on electronic publication. Editorial. S/O 6
